# VISION TECH SOLUTIONS DMCC

Vision Tech Solutions has grown out of being a small IT company to one of the leading players in the industry. Our journey is marked by continuous growth and a dedication to providing cutting-edge solutions.

Vision Tech Solutions specializes in providing companies with IT infrastructure and support services that enable them to be the top leader in the market with a clientele of every sector from government agencies, educational institutions, healthcare providers, manufacturing firms, retail stores, and financial services organizations. With having more than Twelve years of experience servicing Dubai, UAE, Vision Tech Solutions understands the challenges faced by small and medium-sized businesses and for that we are one call away to provide our best IT services, confidentially, effectively, professionally and cost effectively with our highly qualified staff.

# MISSION & VISION

WWW.VISIONTECHSOLUTIONS.COM

## **Our Mission:**

Customer satisfaction is what we aspire for. Vision Tech Solutions is to provide you with the best possible customer service and technical support for your business. Our team of highly trained, experienced professionals is there to provide quality services dedicatedly in a short time.

## **Our Vision:**

Vision Tech Solutions seeks to be industry leaders in IT Solutions worldwide by delivering exceptional value and performance through Top class IT services. Our goal is to continue growing our business sustainably and maintaining an outstanding reputation among all our stakeholders while also growing our people, professionally and personally.

# OUR SERVICES

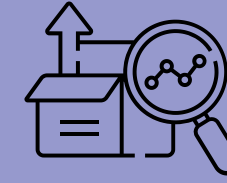

## Managed Services

Managed services are the most economical way to get the technology you need to run your business. By outsourcing your IT infrastructure management from Vision Tech Solutions, you'll gain the benefits of a well-trained staff without having to pay the cost of hiring and training a full-time employee. Our IT support services, and managed services offering can ensure the optimal operation of your computers, network, desktops and entire Information Technology Infrastructure solution.

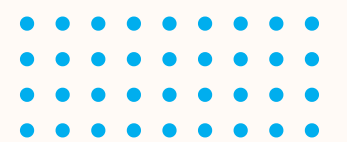

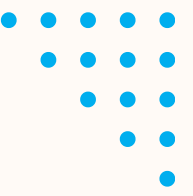

## Cloud Services

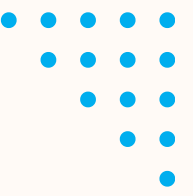

Cloud computing is the future of the information age. Instead of buying expensive servers and software, you can simply rent space on a server farm and use your own software. The advantages are endless, including lower costs, increased productivity, and improved security.

## Upgrade / Software

We offer upgrades and software to ensure you have the latest and greatest technology available. You'll also receive the most current updates to keep your system up to date.

# OUR SERVICES

## Development & Design

If you're looking for a professional website design and development company, we are here for you. Vision Tech Solutions has years of experience creating websites for companies of all sizes.

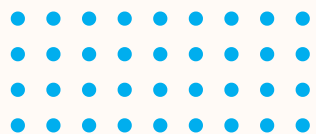

## Cyber Security

With the rapid growth of online shopping, the Internet has become a major target for hackers and cybercriminals. Our top-notch cybersecurity solutions help you to secure your business from cyber threats and keep your data safe and your mind at ease.

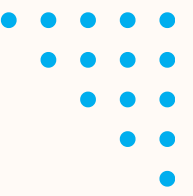

## Wireless Equipment

Upgrade your communication game with our wireless telephone solutions and organize your lives while moving around with no connectivity issue.

## Dubai tech firm offers free consultancy to SMEs

**DUBAI:** As work-from-home strategies become mandatory to combat the spread of COVID-19, employers and businesses need to be even more vigilant than usual, from the perspective of reducing the risk of data breaches and cybersecurity threats, some of which specifically target remote access strategies.

To address these concerns, Dubai's Vision Tech Solutions DMCC, who specialise in IT infrastructure and support, are offering a free technology solution consultancy to small and medium enterprises (SMEs), to enable them to move to remote working arrangements without compromising the security of their data and networks. **Rajab Ali Virani, Managing Director of Vision Tech Solutions DMCC,** says, "As the world goes into a lockdown mode to contain the pandemic, cybercriminals will not be curtailing their efforts to access valuable data during the outbreak. They will, in fact, take the advantage of the situation to launch malicious attacks, which can result in errors and outages".

Customer-facing industries, such as airlines, hospitality and healthcare, are particularly in need of effective tech support and solutions. Educational institutions are another sizable sector that needs such support, to replace physical classrooms with online e-learning alternatives.

One of the other challenges of a work-from-home policy is that employees are not being able to connect to appropriate servers that boost their productivity.

## BoD highlights UBF's current priorities

**Top officials pose for a group photo ahead of the meeting.**

**DUBAI:** The Board of Directors (BoD) of UAE Banks Federation (UBF) held its first meeting of the year via Videoconferencing to discuss the latest developments in the UAE banking sector as well as progress of key concerns.

During the meeting, the BoD discussed UBF's current priorities, which in light of the worldwide outbreak of COVID-19 include ensuring continuity of banking operations, hand in hand with Central Bank of the UAE, and supporting businesses

across the UAE. They also outlined initiatives to be rolled out throughout the rest of the year aimed at increasing innovation in the industry, enhancing Emiratisation, and supporting the real estate sector.

**AbdulAziz AlGhurak, Chairman of UAE Banks Federation,** said: "The global outbreak of COVID-19 has presented us with various challenges that collectively as a nation we are addressing head-on. And, as a critical industry, the banking sector has an especially unique responsibility to safeguard society and the economic environment. This will continue to be our utmost priority, and we will do whatever it takes to fulfill our mandate to support banks and local community as we navigate

through this uncertainty together. However, it is important that we not lose sight of our vision during these difficult times, and continue to promote growth and transformation across the industry for the benefit of the wider country. Whether it is tackling the ever-changing challenges in the market, or fostering policies and frameworks to drive innovation, we are continuously working towards a sustainable and diversified economy to secure a better future for the entire nation." UBF BoD also commended UAE government's strong leadership, and stressed the importance of continued coordination between strategic partners to mitigate the impact of COVID-19.
